CSS, HTML, JavaScript, TypeScript, ReactJs, Redux, Github, JIRA

Bootstrap, Material UI, SCSS, Tailwind CSS

NodeJs, Express, Python, EJS

MongoDB, SQL, Firebase Realtime

EDUCATION

Bachelors In Computer Application

Jagannath University

2014-2017

1st position in all semesters with 88%

AWARDS & HONORS

- Got Team shoutout 2 times
- 3 times Insta Awards in Infosys
- 12 Academic Awards in BCA
- Won Pat on Back Badge 2 times

PROFESSIONAL SUMMARY

Experienced full-stack developer with around 6 years of expertise in web designing and frontend development. Thrives in fast-paced startup environments, adapting seamlessly to challenges. Collaborated with cross-functional teams of 20+ people. Proficient in Jira and GitHub for efficient project management and version control. Committed to delivering outstanding, clean code in a collaborative environment. Seeking opportunities to contribute expertise as a React or NodeJS developer.

WORK HISTORY

Senior Platform Engineer - Bangalore

Altimetrik India Limited - Wayfair   September 2022 - Present

- Designed and developed a contracts application from scratch for the client's logistics division, enabling streamlined contract management and enhancing operational efficiency.
- Worked under tough deadline and was able to deliver 2 big features within 2 months towards key releases.
- Created multiple complex transformation functions within the contracts application, automating the conversion process between the user interface (UI) and payload data, resulting in a significant reduction in manual effort and increased data accuracy.
- Developed reusable components such as LinkHandler, Header Breadcrumbs, and Autocomplete, improving development efficiency and maintaining consistent user experience across the application.
- Implemented a data-fetching script that extracted data from Excel sheets, eliminating the need for manual JSON code writing and reducing the time required for data preparation.
- Introduced new features like New Contract and Edit Contract, enhancing the functionality and usability of the contracts application, leading to increased user productivity and improved customer satisfaction.
- Collaborated with external team and navios-design-team to maintain consistency across the contracts application.

Senior Frontend Engineer - Remote

EPAM Anywhere - Thompson Reuters   March 2022- September 2022

- Developed and delivered high-quality, responsive web applications using ReactJS, resulting in enhanced user experience and positive client feedback.
- Led the successful implementation of a performance optimization strategy, resulting in a 30% improvement in page load times and increased overall site speed.
- Collaborated with cross-functional teams to gather requirements, provide technical insights, and contribute to the overall architecture and design of web applications.
- Created reusable React components and implemented best practices to ensure code modularity, scalability, and maintainability.
- Conducted code reviews and provided constructive feedback to team members, fostering a culture of continuous improvement and adherence to coding standards.
- Resolved complex technical issues and bugs, demonstrating strong problem-solving skills and attention to detail in a fast-paced development environment.

SDE Frontend - Bangalore

Jio Platforms Limited - AJIO   August 2021 - March 2022

- Successfully managed an e-commerce platform with over 2.2 million active users, ensuring smooth operations and exceptional user experience.
- Led the migration of 80% of Class Components to Functional Components, resulting in improved code maintainability, performance, and development efficiency.
- Delivered multiple payment-related sprints within tight deadlines of 1 week using React JS, contributing to seamless transaction processing and customer satisfaction.
- Led the implementation of E-Gift card functionality, collaborating with the development team and stakeholders to deliver the feature within the designated timeline.
- Worked closely with the marketing team to optimize HTML email templates, improving engagement and conversion rates.

Frontend Developer - Pune

Infosys Limited - (BMW, Lumen Tech, GST gov)   December 2017 - August 2021

- Increased productivity levels and contributed to long-term success by implementing process improvements, resulting in a boost of approximately 20% in overall productivity.
- Successfully performed API configurations for different environments and assigned users to APIs using the CA API Gateway tool, ensuring seamless integration and secure access to APIs.
- Ensured content versatility and compliance with accessibility standards by adhering to WCAG 2.0.1 guidelines, enhancing user experience and inclusivity.
- Developed efficient and reusable code modules that significantly reduced development time by 2-3 hours per week per developer, increasing overall productivity and project efficiency.
- Built highly reusable code components that improved application performance by 15%.
- Recognized for outstanding contributions with Insta Awards, receiving the prestigious accolade twice in January 2020 and August 2021, highlighting exceptional achievements and contributions to the organization.
